Power Connections

Terminal type	Rising cage screw clamp
Terminal capacity	1 x 0.5-2.5mm ² solid or stranded
Recommended cable	Refer to appropriate regulations
Max cable length	Refer to appropriate regulations
Operating voltage	220 - 240V 50-60Hz
Quiescent power consumption	1W
Recommended circuit protection	10A MCB

Note: In accordance with current wiring regulations a means of disconnection (e.g. switch) must be incorporated into the fixed wiring.

DALI Bus Connections - DALI variants

To prevent loose strands being outside the terminal a tool e.g. a screwdriver, must be used to push the button on the terminal when stranded conductors are inserted.

Warning: Do not connect to 230V.

Warning: The DALI Bus is not classified as SELV. The same procedures and safeguards must be applied as when working with mains voltage.

Max devices	25 DALI control gears (ballasts or drivers) - 50 mA

Note:
1. DALI gears (ballasts or drivers) are normally wired from an unswitched supply.
2. Ballasts or drivers must be DALI Control Gears complying to IEC 62386 V1 or V2.

Volt-free Output Connections

The volt-free output can be used as a live switched output by linking it to the live terminal as shown.
