

INDECO SENSOR

INTRODUCTION

The Indeco Sensor is designed to provide the quickest and simplest installation of any product in the Dextra range by combining the trunking, electrical system and quick release luminaires in a single range.

The Indeco Sensor trunking is available in 4.5M, 3M and 1.5M lengths with either 6 pole or 4 pole through wire looms, each loom has a socket connector at 1.5M intervals with a corresponding connector on the rear of the luminaire housing. Each trunking length connects to the next with a simple splice plate and plug and socket connector allowing installation of the trunking with no need to wire electrical connections, the luminaires can then be installed in the required positions with twist lock mounting clips and plug and socket electrical connections. The trunking itself is mounted with snap on sprung steel clips ensuring that the entire system can be installed without tools or wiring of electrical connections except for a single connection at the beginning of each trunking run.

The luminaires can be continuously run or spaced as required with snap in infill covers between, this combines with a wide range of lumen outputs and lensed or opal diffusers ensuring installations can be configured precisely to ensure effective lighting with a minimum of energy consumption. Integral sensors, lithium emergency, dimming and wireless variants are also available ensuring that the Indeco Sensor system can fulfil all requirements for safety, energy efficiency and reporting. We offer a range of wireless control systems providing localised grouping and control as well as comprehensive wireless solutions allowing both standard and emergency luminaires to be centrally monitored.

CE IP20 TM21: L90>60K HOURS / L80>90K HOURS 3 STEP MACADAM ELLIPSE

APPLICATION

- Industrial / Manufacturing
- Retail
- Transport
- Warehousing

SPECIFICATION

CONSTRUCTION

- · Housing: Extruded aluminium
- · Finish: Mill finish aluminium
- Endcaps: Injection moulded polycarbonate
- Diffuser: 2mm extruded high transmission opal polycarbonate
- Lens: Injection moulded polycarbonate lens
- IP20

PERFORMANCE

- Part L2 compliant
- 3SDCM Three step Macadams ellipse
- TM21: L90>60K Hours / L80>90K Hours
- Up to 163 luminaire lumens per circuit Watt.

ENVIRONMENTAL

- Designed to allow simple replacement of components with commonly available tools in compliance with the Eco Design Directive, please see the installation leaflet for maintenance instructions.
- All critical components are mounted on a single tray for simple end of life repair or upgrade.
- · Powered by European branded drivers and emergency modules ensuring replacement parts are easily sourced.
- Every luminaire is labelled with a unique ID number allowing easy identification of spare parts for the lifetime of the product.
- Contains no single use plastics or polystyrene packaging.
- Supplied in plain card boxes with paper tape ensuring packaging is easily recycled.
- · Designed to allow simple disassembly for end of life recycling.
- UK based manufacturing providing local support throughout the product lifetime and minimising transportation miles.

EMERGENCY

- Available with optional standard, self test and autotest integral emergency with lithium batteries for extended warranty and lifetime.
- Optional Reacta-Link wireless emergency for automated centralised reporting.
- Optional Reacta-Control wireless emergency for automated centralised reporting.

• Optional central battery changeover relay

CONTROL

- HFR 1-10V analogue dimming and phase cut dimming
- Optional DALI dimming
- Optional compatibility with a range of dimming systems including DALI, DSI and Switch Dimming
- Optional Integral R44 presence and daylight sensor
- Optional Integral Reacta-Air wireless presence and daylight regulations sensor
- Optional integral Reacta-Link for integration with Reacta-Link wireless installations
- Optional integral Reacta-Control for integration with Reacta-Control wireless installations
- Ground level commissioning with REA-AP controller allows quick and simple setting and adjustment of sensors without the need for costly commissioning.

INSTALLATION

- Suitable for suspended installation
- Trunking pre-wired with 4 or 6 pole 2.5mm loom with socket connectors allowing installation of luminaires at 1500mm intervals.
- Tool-less assembly for both electrical and mechanical installation.
- Trunking pre-assembled with splice plates and up to 4500mm lengths providing rapid installation.
- Snap on suspension brackets for quick mounting.

VARIATIONS

- Available with a wide range of colour temperatures and renderings
- Available in a range of lumen outputs
- Available in white, black or grey finishes

TECHNICAL

WARRANTY

At Dextra our commitment to service has been at the forefront throughout our history spanning more than forty years in the UK lighting market. Our service ethos extends beyond design and delivery, we believe supporting your installation throughout the warranty period is equally crucial, whilst the strength and longevity of Dextra Group provides peace of mind that our warranty will be supported throughout.

The Dextra range is supplied with a five year warranty commencing from the date of delivery. During the first three years defects will be repaired on site and the warranty will include both parts and labour. For the final two years drivers, emergency modules, wireless modules, sensors and LED circuits will be supplied free of charge to replace defective components, labour and other associated costs are not included.

Certain ranges and components are subject to exemptions:

- Lithium batteries are provided with a five year warranty. During the first three years defects will be repaired on site and the warranty will include both parts and labour. For the final two years replacement batteries will be supplied free of charge to replace defective components. Five year warranty became effective as of 03/02/25, Lithium emergency luminaires supplied prior to this date are supported with a three year on site warranty only. Labour and other associated costs are not included. Nickel Metal Hydride and Nickel Cadmium batteries are provided with a one year warranty for parts and labour.
- Emergency luminaires including AME LED, EXI LED, EXI3, EXI Track, HBE LED, HBE3, OAT2 LED, OEZ2 and Twinspot are supplied with a one year warranty for parts and labour. Lithium variants suffixed with the 5YR part code, the Autotest emergency with the LA3 part code and wireless variants with LA3RC or LSTR part codes are supplied with a five year warranty. For these extended warranty variants for the first three years defects will be repaired on site and the warranty will include both parts and labour. For the final two years replacement batteries will be supplied free of charge to replace defective components.

- Protec Micro, PTECF7 Fire Rated Downlights, Serenus and the Opus Sconce are provided with a five year replacement luminaire only warranty. Protec FR Fire Rated Downlights are provided with a 2 year replacement luminaire only warranty.
- Controls systems such as standalone sensors, switches, marshalling boxes and cabling are provided with a one year warranty for both parts and labour. DALI control systems are provided with a two year warranty for both parts and labour.
- LEDextra ranges are supplied with a three year parts or replacement luminaire only warranty with the exception of the
 IMPR RGBW, the Runway RBGW, the MOD RGBW, Tanek RGBW and the DexRing. These five ranges are supplied with our
 standard five year warranty during which defects within the first three years will be repaired on site and the warranty
 includes both parts and labour. For the final two years free of charge replacement components only will be supplied to
 rectify any failures but labour and other associated costs are not included.
- LEDEX ranges are supplied with a three year replacement luminaire only warranty.
- The Decorative Pendant ranges, Bebo, Dene, Nova, Fino and Stix are supplied with a 3 year replacement luminaire only warranty.

All warranties are subject to correct use of the product and will be invalidated by misuse, for example incorrect installation, unsuitable environmental conditions or incorrect maintenance. It is the duty of the customer to ensure that all the fault lies with the luminaire prior to requesting replacement parts or site repairs. In the event that no defect is found with the product our costs for attending site will be recharged to the customer and credit will not be issued against returned products. No consequential losses incurred resulting from any defect with our product will be reimbursed.

Given the nature of LED technology a small percentage of LEDs may fail during the lifetime of a luminaire, this does not cause a reduction in lumen output. As such LED luminaires are only deemed to be faulty for warranty purposes when in excess of ten percent of LEDs have failed in a single luminaire.

On site repair of products under warranty will be undertaken during normal working hours, 9am to 5pm Monday to Friday, and will require unrestricted access to luminaires. Where required Dextra will provide access equipment to carry out repairs at height, should luminaires have been installed in locations where reasonable provision for maintenance access has not been made we reserve the right to supply replacement product only. On site warranty repairs will only be undertaken on the mainland of the UK and Ireland, in all other locations replacement product only will be provided.

If you require any assistance with regards to our products please contact our Customer Services department on 01747 858100.

DIMMING

Code	Description
A	DALI Digital Addressable Lighting Interface
D	DSI Digital Dimming
Н	HFR Analogue 1-10v

CONTROL

Code	Description
R44M	Reacta 44 Mini Integral Sensor
RLI	Reacta-Link, Wireless Enabled Luminaire
RC	Reacta-Control, Wireless Enabled Luminaire

EMERGENCY

Code	Description
LE3	Lithium Standard Emergency 3 Hour

INDECO SENSOR

PRODUCT SPECIFICATION

LS3	Lithium Selftest Emergency 3 Hour
LA3	Lithium Autotest Emergency 3 Hour
LSTR	Lithium Reacta-Link Emergency 3 Hour
LA3RC	Lithium Reacta-Control Emergency 3 Hour
Emergency not available with L150 variants	

MISCELLANEOUS

Code	Description
C**	Select Colour Temperature and Rendering; C827, C83, C85, C865, C93, C94
LSF	Low Smoke Zero Halogen

Indeco Installation

220-240V / 50-60Hz IP20

Terminal Labelling

Unswitched Live DALI Autotest DALI Autotest

Analogue/DSI/DALI Analogue/DSI/DALI Switch Dim / Corridor Function

WARNING: Luminaire must be earthed. Risk of electric shock from LED boards if operated with cover removed. Installation / operation outside of luminaires intended scope invalidates warranty. Suitable only for domestic / light industrial / industrial applications within the scope of EN55015. Tested to compliance with BSEN 60598: specification for general requirements and tests. Must be installed by a suitably qualified person in accordance with all relevant legislation. Ambient operating temperature of 0°C to 25°C. If maximum operating temperature is exceeded luminaire will automatically dim/switch off. Terminal blocks are rated to 16A unless stated otherwise. The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person. LUMINAIRES WITH EMERGENCY PACK: When supply is isolated battery output terminals may be live if battery is connected. Isolate mains and battery before servicing. Emergency luminaires require unswitched live connection taken from same phase as switched supply. When unswitched supply is connected status indicator illuminates green, when unswitched supply is disconnected indicator extinguishes and luminaire operates in emergency mode. 24 hour charge period required before undertaking full discharge test. Emergency test sheets provided should be used to record all emergency tests. Batteries should be replaced when 3 hour duration is not met. Excessive switching of permanent live may result in premature battery failure. Battery electrolyte can be harmful to eyes / open wounds, do not puncture, if electrolyte touches skin / eyes flush with water. Do not incinerate batteries.

1. Ensure a minimum of 350 mm is left at the start of run for the power feed

unit shown in step 3.

Max. 2500mm 250mm

Suspend mount the first section of 4500mm trunking as shown. The firstdrop should be \sim 250mm from the start of the trunking. Ensure a maximum spacing of 2500mm is maintained between suspension mount points.

2.

Suspension install

Feed the suspension wires through the barrel clutch in order to suspend the trunking. Use clutch to adjust height and to ensure tunking is level.

4.

Suspend mount subsequent sections of 4500mm, 3000mm or 1500mm trunking as shown. Ensure a maximum spacing of 2500mm is maintained between suspension mount points.

> Max. 2500mm Max. 2500mm

The last section will require a final suspension mount point positioned 250mm from the end of the trunking

Indeco Installation
