## OPUS COLUMN SENSOR

---

## INTRODUCTION

---

The Opus Column Sensor combines a robust die cast aluminium housing, polycarbonate diffuser and marine grade paint finish with an attractive contoured housing ensuring it can be used in arduous applications without compromising aesthetic appeal. These features do not compromise practicality, the Opus Column Sensor incorporates an adjustable spigot allowing for vertical or horizontal mounting adjustable in five degree increments, the control gear department includes an automatic disconnect feature allowing individual luminaires to be serviced without the need to isolate entire circuits and the luminaire is also supplied complete with a ten metre prewired lead for quick and simple connection at the column base.

The Opus Column Sensor also incorporates our R11 sensor offering presence detection and a wide range of adjustable parameters such as time delays, dimming levels during absence, dimming rates and optional secondary time delays to turn the luminaire off altogether, all programmed via remote control from ground level. An optional NEMA socket allows for integration of a photocell for use for dusk to dawn operation. This versatility is further enhanced with three lens options, open area, wide or asymmetric and lumen outputs ranging from 4,400 up to 25,000 as well as optional integral lithium emergency and wireless control options where central web based control and reporting of luminaires is required. We offer a range of wireless control systems providing localised grouping and control as well as comprehensive wireless solutions allowing both standard and emergency luminaires to be centrally monitored.

---

## APPLICATION

---

- Commercial / Offices
- Education

- Exterior
- Healthcare / Social Housing
- Hotel / Leisure
- Industrial / Manufacturing
- Parking / Exterior
- Retail
- Transport

---

## SPECIFICATION

---

### CONSTRUCTION

- Housing: 0.7mm CR4 steel
- Housing: High pressure die cast aluminium
- Finish: Polyester powder painted RAL 9006 matt grey
- Finish: Polyester powder painted RAL 9005 matt black
- Finish: Manufactured with a marine grade paint finish to ensure durability in harsh environments.
- Diffuser: Injection moulded clear polycarbonate
- Lens: Injection moulded polycarbonate lens
- IP65

### PERFORMANCE

- Part L2 compliant
- 3SCDM Three step Macadams ellipse
- TM21: L90 at >80,000 Operating Hours
- Up to 160 luminaire lumens per circuit Watt.
- Asymmetric lens option allows for optimised spacing's between columns, also available with Open Area and Wide lenses.
- Adjustable high light levels allows light output to be adjusted after installation to meet the exact requirements of the installation preventing the need to install multiple luminaire variants and maximising energy savings.

### ENVIRONMENTAL

- Designed to allow simple replacement of components with commonly available tools in compliance with the Eco Design Directive, please see the installation leaflet for maintenance instructions.
- Powered by European branded drivers and emergency modules ensuring replacement parts are easily sourced.
- Every luminaire is labelled with a unique ID number allowing easy identification of spare parts for the lifetime of the product.
- Contains no single use plastics or polystyrene packaging.
- Supplied in plain card boxes with paper tape ensuring packaging is easily recycled.
- Designed to allow simple disassembly for end of life recycling.
- UK based manufacturing providing local support throughout the product lifetime and minimising transportation miles.

### EMERGENCY

- Available with optional standard, self test and autotest integral emergency with lithium batteries for extended warranty and lifetime.
- Optional Reacta-Link wireless emergency for automated centralised reporting.
- Optional Reacta-Control wireless emergency for automated centralised reporting.

### CONTROL

- Optional Integral R11 presence sensor
- Optional integral Reacta-Link for integration with Reacta-Link wireless installations
- Ground level commissioning with REA-AP controller allows quick and simple setting and adjustment of sensors without the need for costly commissioning.

### INSTALLATION

- Suitable for column installation, please specify spigot size required.
- Available with 40-50mm, 50-60mm or 60-76mm spigot
- Supplied with 10M prewired lead

### VARIATIONS

- Available with a wide range of colour temperatures and renderings
- Available in a range of lumen outputs
- Available in grey or black finishes

## WARRANTY

---

At Dextra our commitment to service has been at the forefront throughout our history spanning more than forty years in the UK lighting market. Our service ethos extends beyond design and delivery, we believe supporting your installation throughout the warranty period is equally crucial, whilst the strength and longevity of Dextra Group provides peace of mind that our warranty will be supported throughout.

The Dextra range is supplied with a five year warranty commencing from the date of delivery. During the first three years defects will be repaired on site and the warranty will include both parts and labour. For the final two years drivers, emergency modules, wireless modules, sensors and LED circuits will be supplied free of charge to replace defective components, labour and other associated costs are not included.

Certain ranges and components are subject to exemptions:

- Lithium batteries are provided with a three year warranty for parts and labour. Nickel Metal Hydride and Nickel Cadmium batteries are provided with a one year warranty for parts and labour.
- Emergency luminaires including AME LED, EXI LED, EXI2 LED, EXI Track, HBE LED, HBE2 LED, OAT2 LED, OEZ LED and Twinspot with Nickel Metal Hydride batteries are supplied with a one year warranty for parts and labour. Lithium variants of these ranges are supplied with a three year warranty for parts and labour with the exception of the AME2, EXI3, HBE3 and TWS IP65 L7 ranges which are supplied with a one year parts and labour warranty. TWS IP65 L7 in autotest and wireless variants are supplied with the standard three year lithium battery warranty.
- Protec Micro, PTECF7 Fire Rated Downlights, Serenus and the Opus Sconce are provided with a five year replacement luminaire only warranty. Protec FR Fire Rated Downlights are provided with a 2 year replacement luminaire only warranty.
- Controls systems such as standalone sensors, switches, marshalling boxes and cabling are provided with a one year warranty for both parts and labour. DALI control systems are provided with a two year warranty for both parts and labour.
- LEDextra ranges are supplied with a three year parts or replacement luminaire only warranty with the exception of the IMPR RGBW, the Runway RGBW, the MOD RGBW and the Tanek RGBW. These three ranges are supplied with our standard five year warranty during which defects within the first three years will be repaired on site and the warranty includes both parts and labour. For the final two years free of charge replacement components only will be supplied to rectify any failures but labour and other associated costs are not included.
- LEDEX ranges are supplied with a three year replacement luminaire only warranty.
- The Decorative Pendant ranges, Bebo, Dene, Nova, Fino and Stix are supplied with a 3 year replacement luminaire only warranty.

All warranties are subject to correct use of the product and will be invalidated by misuse, for example incorrect installation, unsuitable environmental conditions or incorrect maintenance. It is the duty of the customer to ensure that all the fault lies with the luminaire prior to requesting replacement parts or site repairs. In the event that no defect is found with the product our costs for attending site will be recharged to the customer and credit will not be issued against returned products. No consequential losses incurred resulting from any defect with our product will be reimbursed.

Given the nature of LED technology a small percentage of LEDs may fail during the lifetime of a luminaire, this does not cause a reduction in lumen output. As such LED luminaires are only deemed to be faulty for warranty purposes when in excess of ten percent of LEDs have failed in a single luminaire

On site repair of products under warranty will be undertaken during normal working hours, 9am to 5pm Monday to Friday, and will require unrestricted access to luminaires. Where required Dextra will provide access equipment to carry out repairs at height, should luminaires have been installed in locations where reasonable provision for maintenance access has not been made we reserve the right to supply replacement product only.

If you require any assistance with regards to our products please contact our Customer Services department on 01747 858100.

### CONTROL

Code	Description
R11	Reacta 11, Presence, IP65, Low Temperature, 3-15M
NEM	NEMA Socket
PH	Photocell
RLS10	Reacta-Link Wireless, Presence, 5-10M
RLS15	Reacta-Link Wireless, Presence, 10-15M

### SPIGOT

Code	Description
S40	40-50mm Spigot
S50	50-60mm Spigot

S60	60-76mm Spigot
OPUC WB	Opus Column Wall Mount Bracket
Please specify spigot size when ordering.	
Please order luminaire less spigot when purchasing the wall mount bracket option.	

### EMERGENCY

Code	Description
LE3	Lithium Standard Emergency 3 Hour
LS3	Lithium Selftest Emergency 3 Hour

When using emergency please ensure that separate permanent and switched live feeds are supplied to the luminaire. If there is only a single live feed this must be permanent and the integral photocell must be specified with the luminaire to ensure it will turn off during daylight hours. Please check with our Technical Department before ordering.

Emergency only available in L200 and lower variants.

### MISCELLANEOUS
